

MWG Joins Hands To Donate 5 Billion VND To Support People Severely Affected By Typhoon Yagi & Flash Floods

Typhoon Yagi is considered the strongest storm in the past 30 years in the South China Sea.

In the spirit of solidarity and mutual assistance, MWG employees have carried out many practical activities to support the people of northern Vietnam in recovering from the storm's damage. After passing through, the storm and its aftermath caused severe impacts on the lives of people in many northern provinces. The funds were sent to the provinces of Cao Bằng, Lào Cai, Yên Bái, Lạng Sơn, Tuyên Quang, and Phú Thọ to help recover from the storm and flooding.

Supporting People In Overcoming Damage

- **Thế Giới Di Động (TGDD)** and **Điện Máy Xanh (ĐMX)** are collaborating with suppliers to provide **10,000 rice cookers** to help communities quickly rebuild after the floods.
- Efforts are underway to stock essential items like power banks, rechargeable lights, gas stoves, and more. Support programs are also in place to assist affected communities.

Care & Support For Colleagues

- The union is calling for support to help northern colleagues through this difficult time.
- For more details, see the internal mail **"Supporting Northern Colleagues Overcome the Storms"** from the Union - 2002.

MWG In The Top 20 VNSI Sustainable Enterprises On The Stock Market For The Second Year In A Row

Bách Hóa Xanh Awarded "Ho Chi Minh City Green Enterprise 2024"

MWG ranks among the top enterprises with the best VNSI (Vietnam Sustainability Index) on the stock market for the second consecutive year, based on OECD and GRI standards. The VNSI index is a reputable measure of sustainability for listed companies.

The award from the People's Committee of HCMC honors companies that comply with waste treatment regulations, research and produce environmentally friendly products, and enhance their environmental protection responsibilities.

Bách Hóa Xanh Pilots Plastic Bottle Collection Program

From Aug 19 - Sept 11

4 Stores

Collected 137 Plastics Bottles

To promote waste sorting at the source, reducing plastic pollution, and allowing customers to join in environmental protection efforts, the project has received positive responses from customers. It is expected to be expanded after the trial phase.
